PROFILE SUMMARY

Computer Science undergraduate (CGPA 8.60/10) with a solid foundation in Java, Database Management Systems, and Computer Networks. Building practical experience across full-stack web technologies — HTML, CSS, JavaScript, React, and Spring Boot — and currently exploring Artificial Intelligence & Machine Learning as part of a final-semester project. A clear communicator and dependable team player, looking to bring adaptability and a strong learning mindset to an entry-level role.

INTERNSHIP EXPERIENCE

Data Analysis Intern – Plasmid

- Cleaned and analyzed structured datasets in Python to support internal reporting.
- Worked with raw data exports, handling missing values and formatting issues before analysis.
- Summarized findings into short reports the team used for decision-making.

PROJECTS

LearnAR — Augmented Reality Learning Platform | *HTML, Echo3D*

- Developed an educational learning platform using HTML, integrated with Echo3D to render interactive 3D augmented reality models.
- Enabled users to view and explore AR models directly within learning content, making complex concepts more engaging and easier to understand.
- Designed the platform with a focus on enhancing the learning experience through interactive, visual content delivery.
